

How to save more on wireless phone/data services AND increase employee retention.

Small to medium-sized organizations really appreciate Verizon Wireless' special corporate program: waived activation fees, a minimum 8% discount on monthly unlimited data (PDA email and internet) and Mobile Broadband (aircards, Netbooks) , lower overage rates and special equipment prices with a virtually unlimited number of lines and minutes to share on the same account - no 5 line restriction. There are special share plans for small businesses that allow a smaller business to add lines of service for just \$9.99 up to 50 users for handsets and PDA's like Blackberries too.

Then Verizon Wireless helps business customers become heroes to their employees because we offer the program and tools to promote the monthly 8% savings and special phone prices to employees who want to become Verizon Wireless customers themselves. This makes both employers and employees happy!

We provide personal assistance to employees and their family members to become Verizon customers and handle all the paperwork and processing for the company. The employee's personal service is billed to the employee not the company. And existing Verizon customers amongst their employees need only to register their lines to receive the 8% per month savings and other benefits
